

Nikolaos Georgopoulos - Ninos

Computer and Informatics Engineer

 nikosninosg@gmail.com | Greek nationality

 nikosninosg |  CV: nikosninosg.github.io

Work Experience

07/2022 - present

Software Engineer

Cognity, Athens, Greece

- Oracle Order & Service Management, WebLogic server, Specialized tester
- Spring Boot – New AI Web Application | Co-Developer & Contributor
- Projects SPOC – Feasibility, Analysis, Design, Development, Deployment

Technologies: XQuery, Python, MySQL, Java, Oracle OSM, SVN, Git, Spring, Keycloak, Emulator, Citrus

02/2022 – 06/2022

Back-End Developer

INDUST Systems, Patras, Greece

- Cloud development services on the **IoT platform** IoTControl, to improve efficiency and reduce energy consumption on production lines.
- AI development - enabled App for product quality control during the pasteurization process, in the European research project zPasteurAlzer

Technologies: Python, TypeORM, Docker, Typescript, MySQL, Grafana

03/2021 - 05/2021

Customer Support Engineer (Internship)

Pobuca, Athens, Greece

- Analysis and resolution of technical issues in Business Applications
- Configure and support Infrastructure requests (Microsoft 365 etc.)
- Applications testing
- Organization and monitoring of requests and subprojects

Education

09/2022 – 04/2024

MSc in International Business and Management

ALBA Graduate Business School, The American College of Greece

- Business Economics, Financial Accounting & Management, International Business
- Production & Operations, Marketing Management, Strategy Formulation

10/2016 - 07/2022

BSc in Computer Engineering and Informatics

Department of Computer Engineering & Informatics, University of Patras

Thesis: Design and development of a simulation software system for modeling industrial production processes and implementation of performance improvement methods with real-time data. Degree: 7.5

Projects

2024– 2025

Bi in a Box

End-to-end Business Intelligence and analytics platform designed to transform raw data into actionable insights. It integrates data from multiple sources (e.g., ERP systems, databases) and provides advanced analytics, reporting, and forecasting capabilities. The platform combines data engineering, statistical modeling, and machine learning techniques to support data-driven decision making. It includes automated data pipelines, dashboards, and time-series forecasting modules. Technologies: Python 3.14, Nixtla (StatsForecast, NeuralForecast, MLForecast),

Docker, Pandas, Scikit-Learn, Bash shell

2022 – 2023	New Premium Internet Access by OTE-COSMOTE Premium Internet Access is a product that extends the OTE Business Product portfolio providing a Symmetric Internet Solution. Delivers the Order to Bill and Fault to Repair solution including Over Capture with Oracle Siebel CRM, Central Order Management, Service Order Management and Technical Order Management with Oracle OSM platform and service modeling with Oracle UIM.
2021 - 2022	Industrial IoT controllers for digitization of production lines by Athenian Brewery Industrial planning IoT RaspberryPi platform-based controllers for receiving production process signals, data pre-processing, sending data to the cloud server, receiving commands from the web services and execution of orders in industrial automation. Technologies: Python, Redis, MQTT, MySQL, Shell Scripts
2019 - 2020	Web Application for visualizing crowd behavior Development of a system for collecting, managing, and analyzing crowdsourcing information, for spatiotemporal data of human activity. Technologies: HTML, CSS, PHP, Javascript, MySQL
2017 - 2018	IoT Application for taking measurements from energy meters Application development on IoT devices (RaspberryPi based) for communication with energy meters (electricity, water, steam, etc.) using the RS-485 protocol (Modbus RTU). It was applied in a pilot project of the IoT-Lab laboratory at the factory of the Athenian Brewery (Heineken) in Patras. Technologies: Python, Modbus RTU, Linux

Conferences seminars

07/2023	Cybersecurity by ACTA 80 hours training Risk assessments, identifying potential vulnerabilities, implementing effective security measures to safeguard critical data and systems. Company's resilience against cyber threats, maintaining a secure and protected environment.
06/2022	DevSecOps Academy powered by ReGeneration and Code.Hub Training program in DevSecOps Processes & Principles, Infrastructure & Configuration Management, Continuous Pipelines, Cloud Computing Building Blocks, AWS & Azure Basics, Identity & Access Management, High Availability and Scalability aspects, Storage Services & Databases, Security & Encryption, Networking, Containers & Orchestration, Monitoring.
2019	IEEE DCOSS 2019 15th IEEE International Conference on Distributed Computing in Sensor Systems, Santorini, Greece
2016	Digital Marketing Basic principles of digital marketing, Google

Volunteering

03/2021 – 02/2022 **Team Leader at Mindspace NPO**

Leading a team for designing, creating, and operating an IoT laboratory in Patras. Mindspace's objective is to foster entrepreneurship and creativity in startups through mentorship and the provision of essential tools.
